The VITRO-i

Designer glass heater

ADVANCED ELECTRIC HEATING

ducasa
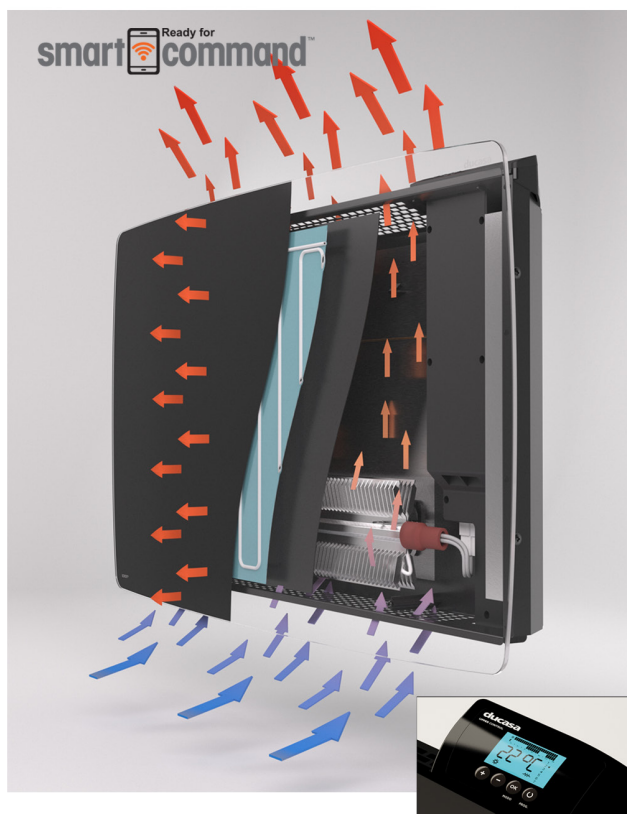

The stunning glass fronted Ducasa Vitro-i is available in black or white and incorporates a dual element for fast heat up times and added comfort. The high quality 'X' profile aluminium element produces warm air, which combines with the glass bonded long-wavelength radiant element to produce a comfortable natural feeling heat.

The on-board digital control electronics are compatible with the Smart-Command app system for ease of programming and control whether at home or away.

With or without the app, the Vitro-i can be programmed to operate in Comfort, Economy and Frost protection modes; the temperatures for each can be set individually for the ultimate in comfort.

The silent Triac thermostat is accurate to 0.1°c which when coupled with the Open Window Detection and adaptive learning Eco-Start features makes this one of the most efficient heaters on the market helping to reduce energy use and running costs.

smart command™ Ready for

Features

- Glass fronted designer heater in white or black
- Available in 3 sizes 750w, 1200w & 1600w
- Dual element radiant and 'X' profile convector
- Low consumption and energy efficient
- Integral 7 day, 24 hour programming
- User set temperatures for Comfort, Economy and Frost protection modes
- Compatible with Smart-Command app control
- Energy saving Open Window Detection
- Intelligent Adaptive Eco-Start system
- Silent TRIAC thermostat with PiD control
- Digital temperature sensor accurate to 0.1°c
- 868MHz receiver and relay transmitter
- Clear LCD screen with backlight
- Tamperproof keypad lock
- Thermal overheat cut-out device for safety
- LOT 20 Compliant

Code	Wattage	Size in mm W x H x D	Colour	IP Rating	Voltage	Insulation	Weight kg
